The small circle indicates the Birthplace of the Mail Order Business, a single room about 12 by 14 feet, in which Montgomery Ward began to sell goods by mail in 1872

FIFTY-FIVE years ago a young man rented the small room pictured at the right, and with less than two thousand dollars he started in business for himself.

Thousands of other young men began business in that year, 1872—just as they do every year. Why was the success of Montgomery Ward so outstanding? Why has his name become a household word in America and known throughout the world?

What did that young man have? What was his *plan*—that succeeded so wonderfully? What was done in that small room that established so firmly the foundation of this vast business of Montgomery Ward & Co.?

It seems very simple to us now. All great things are simple. Mr. Ward merely had an idea to sell goods by mail—to offer to all America the low prices and the great advantages of the large city.

He coupled with this idea a decision that sprung naturally from strict personal integrity — to deal with these unseen customers always in the Spirit of the Golden Rule.

And as the only way to put the Golden Rule into his business, he established new standards in the *quality* of the merchandise he sold. "I will buy and sell only honest quality merchandise—the kind that I would have others sell to me. I will never sacrifice quality to make a seemingly low price. The merchandise I sell must always stand inspection and use."

And so he not only originated the mail order business, but he printed the first mail order guarantee: "Your Money Back If You Are Not Satisfied."

Fifty-five years is a long time to test the service and the soundness of a business. And no business that is not sound could have weathered the storms of more than half a century.

Today seven great stores with 16,000 employes, serving 8,000,000 customers, buying in huge quantities two hundred million dollars worth of merchandise annually, testify to the success of this Company in living up to its principles and in fulfilling its purpose —*to always offer a saving on goods of honest quality and to deal with every customer under an unbroken guarantee and in the complete spirit of the Golden Rule.*

The reason why each year tens of thousands more customers start sending their orders to Ward's is because of this *confidence* in our merchandise—confidence that has been built through fifty-five years of dependable quality and faithful service.

In 1872 Mr. Ward with small capital issued his first price lists and began business under the name of Montgomery Ward & Co.

CHICAGO BUILDING

SERVICE

Is the Foundation of Success

AS we serve, so do we succeed. Success, therefore, is always a true measure of the service we render.

If we point with pleasure to the seven vast buildings pictured here, substantial testimony of success, it is with pleasure in our success—*in serving You!*

The customers who fifty-five years ago dealt with A. Montgomery Ward, found that he served them with honest goods, and always at a saving.

The appreciation shown by those original customers won *their* friends to Ward's. The story of Service and Saving spread, so that today the appreciation of over 8,000,000 customers stands expressed in these seven buildings with over 160 acres of floor space. A business that started in the little room only 12 feet square, which is pictured above.

Your patronage made these buildings possible—they measure your appreciation of our service. And they were built to serve you better—located to be near to you so that your orders would reach us quicker, and your goods reach you quicker. They are part of our plan to render service.

The vast buying power of these seven great stores, this concentrated buying for over 8,000,000 customers, means that each article you buy from us has been bought for you in large quantities at the lowest possible price. And *this saving is Yours!* This saving is part of our work for you, part of *our service to you.*

The New Berét Tam

$5.98

512 F 33—Will fit heads about 22 inches, COLORS: Black satin and black bengaline. Also faille and bengaline in colors—Chanel red, monkey skin (a new rose tan), Athenia (rosewood), gooseberry (almond) green, or gobelin (copenhagen) blue. State color wanted. Shipping weight, 2 lbs. 4 oz.

A Queen among Hats—this beautiful model. "The Profile Hat," some call it; with close-fitting brim clearly defining the head lines, throwing the features into splendid relief before it drops in a youthful tam back. Surprisingly flattering to the countless types wearing it in exclusive New York and Paris—where it originated under the spell of the master designer—Berét. Faultlessly fitted, with brim of belting ribbon, and beautiful crown alternating the ribbon with rich black satin or colored faille and bengaline. Silk lined. The "Choice of Spring."

Here are the New Things
Here is the New Fashion Idea

The Perfect Ensemble

ABOVE all—the Ensemble Frock. This was Fashion's demand as she gazed admiringly upon this handsome model, which towered above the hundreds from which it was selected to typify our New Fashion Shop.

Spring's Favorite—this handsome Suit and Frock combined. Cut by a master designer from a very rich quality All Silk Flat Crepe, in black or the new bright Marie red; beautifully combined with a refreshing light tone of the same material.

The frock itself is quite independent of its chic Eton jacket. The light contrasting tone of the blouse faces and collars the jacket, makes half of the smart little belt, and tips the skirt front for new chic. In turn, the darker tone of the frock makes dainty jacket cuffs, and binds the gracious blouse neck.

A radiant sunburst of brilliant embroidery brings new distinction to the lovely blouse, finishes its short sleeves and works a similar theme upon the sleeve puffs of the jacket.

The skirt, queenly in its shirred front and tucked side drape, preserves the slim 1927 silhouette.

A wonderful Ensemble, interpreting Paris and New York in Spring.

WOMEN'S SIZES: 34, 36, 38, 40, 42, 44-inches bust. Lengths from back of neck to bottom of basted hem, 43 and 46 inches only. State size and length. Shipping weight, 1 lb. 8 ozs.

14 F 79—Black with white bodice.
14 F 81—Black with Marie (bright) red bodice.
14 F 83—Marie (bright) red with rose beige bodice.

A Harmony in Georgette

Life is one soft ripple after another, in this Heart-of-Summer Frock—the dream of an artist far in advance of the balmy days, with all the world awaiting the rustle of Spring.

Worked out in filmy All Silk Georgette, of a beautiful web-soft quality. Conceived in exquisite color combinations, such as faint, sweet honeydew with richer canna (red); soft Mother Goose (sand) with deeper cocoa brown; and palmetto (tropical) green, with the shadowy green of the jungle.

Swaying, dreamy style; youthful, modest, and beautifully reserved. Merely one of the myriad examples of the rare new style and quality, and exquisite finish which are now a foregone requisite of our New Authentic Fashion Shop.

Mounted over a self tone seco slip, the frock is lightly attached at a nearly normal waist-line, where the full swaying skirt is shirred onto the faintly bloused waist, under a richly buckled self girdle. Deep self folds of exquisite contrast tier the billowy front skirt, band the beautiful sleeves and finish the lovely artist's neck, with flowing ties. Perfect harmony even to its slim youthful back, and the price—another new revelation.

WOMEN'S SIZES: 34, 36, 38, 40, 42, 44-inches bust. Lengths from back of neck to bottom of basted hem, 43 and 46 inches only. State bust and length wanted. Shipping weight, 1 lb. 4 ozs.

14 F 85—Honeydew (peach) and canna (red).
14 F 87—Mother Goose (sand) and cocoa brown.
14 F 89—Palmetto green and jungle green.

The "NEW IDEA in FASHIONS" has been AN OUTSTANDING SUCCESS

Hundreds of letters have been written to us in appreciation of our work in developing this "New Idea in Fashions" for the American Woman.

OUR CUSTOMERS WRITE:

"I thank you for giving us exactly what we want in the new styles."

"It is a great satisfaction to me to know that I can now order clothes that will not be a disappointment."

"American women owe Ward's a vote of thanks for their New Idea in fashions and for adding to the personal charm and beauty of American women."

HOW WE DEVELOPED "THE NEW IDEA"

THE most important part of our work at Ward's is to find out what you—our customers—want. It is not our task to sell goods—it is our work to find out the things you want, and to buy them for you at the lowest possible prices.

A year ago we set out to find what you—our customers—wanted in women's fashions; what kind of styles; what kind of materials; what kind of workmanship. Then, with this information before us we engaged some of the best style authorities in the country to help us in choosing fashions that would please you best.

What is the 'New Idea in Fashions?'

We found that our customers had very definite ideas about style. All of us know that every year countless thousands of styles are produced, each of which bids for attention. Many of these styles are merely new. The larger number of them have no merit except that they are "different."

We found that our customers demanded new styles, but that they also demanded *good* styles; that they not only wanted a dress that was new, but one that was beautiful—that was in good taste, and a dress that would be becoming. They wanted styles that brought added personal grace and beauty—that added real charm to the wearer. They demanded a material that was an honest material, that was a good material; they wanted in every dress or coat the best possible material for the price.

They demanded a better quality of workmanship. They wanted their clothes to be well made and neatly made. They did not want to sacrifice workmanship or material in order to save an extra dollar; they did not want quality sacrificed in order to make a low price.

In our last catalogue we set about to produce styles that in every way would come up to this New Idea in Fashions. It has been an instantaneous success—it has won the attention of a large part of the American women. Letters of appreciation continue to flow in to us—"Ward's new Style Department has set a new standard in American Fashions."

In this catalogue we again carry out the New Idea in Fashion. You will find in these pages not only new styles, but the *best* of the new styles—styles that are different, and that also are beautiful, that express good taste and that *will* be becoming. Workmanship and material are the best that can possibly be supplied at the price. You can order from these pages without fear of disappointment. You can order any garment entirely at our risk. We will cheerfully refund your money and all transportation costs if anything you order does not more than come up to your expectations.

The Roumanian Dress

14 F 91 A beautifully quaint Dress, where Fashion works out her truest art in richest simplicity. No lovelier medium than the rich heavy All Silk Flat Crepe and no lovelier color combinations than the soft Ombre blending of Athenia (softest old rose) with Grecian (lighter rose) such as in 14 F 281 on Page 13; or cocoa (mellow brown) with Mother Goose (lighter biscuit tan). Add to this the beautiful radiant embroidery and fine soft shirring, typical of the Balkan peasantry. So quaint and artistic is the neck vent at back, closed with soft ties. And so graceful is the self sash, which girdles the semi-bloused waist. Typical peasant sleeves gracefully drape themselves from neck to deep armhole.

WOMEN'S SIZES: 34, 36, 38, 40, 42, 44 inch bust. Length from back of neck to bottom of basted hem 44 and 47 inches. State bust and length wanted. Read "How to Order" on Page 56. Ship. wt., 1 lb. 4 oz.

The Newest Two-Piece Frock

14 F 103 No wardrobe is complete without the dressy Two-Piece Frock, of which this beautiful example typifies the New York woman at her smartest.

According to fashionable preference, it is beautifully cut from a very rich, heavy quality All Silk Flat Crepe and its tailoring is a part of its perfection.

The soft jacket is imbued with a care-free grace. With all its sportive style, it is essentially feminine, with dainty shoulder shirring, graceful sleeves, and dressy tab collar slipped through a piped blouse slot. Jaunty pockets flap over the chic all around buttoned belt; and ombre self pipings bring out just the right tone of contrast. Side plaits follow a beautifully trim line in the soft skirt, attached to a fine batiste bodice.

WOMEN'S SIZES: 34, 36, 38, 40, 42, 44-inch bust. Length from back of neck to bottom of hem, 44 and 46 inches only. State bust and length wanted. Read "How to Order" on Page 56. Shipping weight, 1 lb. 8 oz.

Very Newest Yoke Dress

14 F 97 Never a style more flattering than Fashion conceived in the New Yoke Dress, worked out in tones of loveliest new ombre shading. Exquisite All Silk Flat Crepe is the chosen material, in blendings of Queen Blue (resembling the Alice Blue), with deeper Mosaic Blue; or Gooseberry (clearlight) Green with Palmetto (tropical green). The lighter tone fashions the splendid yoke, inset with openwork braid; also the lovely neck fold and flowing ties. Set on beneath a deep all-around girdle tuck, the beautifully plaited skirt is stitched in trim box design over the hips and front. Full self tone flower.

All Silk Flowered Crepe

14 F 109 "Say it with Flowers" may be beautifully applied to this vitally wide-awake Frock. For it comes in an All Silk Flowered Crepe of realistic and very radiant flower pattern.

Wonderful possibilities it has, despite its modest price; for it will be welcome and refreshing wherever it goes. Leaving all the glory to its pretty coloring, it comes simply and youthfully styled; but collars itself with rich creamy lace, and adds a beautiful ribbon streamer tie in ombre shading, to accent the frock's richest tones.

Soft shirring is the daintiest possible finish for the skirt front, which is essentially soft and clinging. Snap cuffs make the graceful sleeves even more comfortable, and the self sash may be drawn in over the straight back as best becomes you.

This frock is a delightful example of the surprising values in the new styles awaiting you in our New Fashion Shop.

Fine All Silk Flat Crepe

14 F 113 Yours for a surprisingly small amount of money, this quite different Frock, developed in an unusually good quality of All Silk Flat Crepe. Brimful of last minute style, it has the buoyant swing which characterizes the newest spring styles. And again Fashion charms it with ombre trimmings, delightfully darker and brilliant in contrast. This lovely trimming note is evidenced in the sportive collar and wide youthful ties, also upon the beautiful puff sleeves and it has a high accent of metallic braid edging, in gleaming contrast.

Exquisite tailoring marks the finely plaited swaying hip panels, inset with care below a simulated pocket outline, piped with the trimming tone. Richer than the rest, comes the all around self girdle, linked with a novel chain over the front.

You will be an enthusiastic patron of our New Fashion Shop, once you examine our beautiful models, not only for style but relative quality and finish.

Richer Materials–Smarter Lines–Greater Charm

Aristocratic Silhouette

14 F 117 Dignified, graceful exponent of the straight silhouette, with row after row of twin pin tucks extending, front and back, from the shoulder to the border. Here, open box plaits pick up the vertical theme and carry the slender line down to the hem without depriving the wearer of perfect freedom of motion, for the plaits are not stitched down. The sleeves, too, take up the vogue of slenderizing tucks, that disappear at the wrist into a fine French piping, like the finish of the neck.

You'll choose this frock for your very best, because, for sheer beauty, this All Silk Georgette has no equal. But Georgette, as you know, has wearing qualities of surprising endurance for such a delicate looking fabric, and the frock will live to serve you on many a pleasant occasion. Breezy maline shoulder rose. Jap silk slip.

Yoke Frock Is the Newest Thing

14 F 127 Here is a perfect example of the semi-sports influence that dominates the fashion of this season's silk frocks. It is the type of frock most frequently in evidence.

The new yoke effect, cut straight in back, and tapering to a V in front, makes this model especially attractive. The loosely knotted tie continues the line of the lighter shade down to meet the skirt and carelessly effects a union of the two.

A front plaiting is the skirt's contribution to style, while the sleeve does its share by a full puff held close at the cuff. And to top it off, a rose of both shades perches gaily on the shoulder. Gathers at the sides of blouse are caught by a tailored piping and finished with four metal buttons. Developed in a superior quality of heavy All Silk Flat Crepe, in two lovely new colors. Skirt front is attached to bodice top which also forms the vestee.

WOMEN'S SIZES: 34, 36, 38, 40, 42, 44 inches bust. Length from back of neck to bottom of basted hem, 44 and 47 inches. State bust and length wanted. Read "How to Order" on Page 56. Shipping weight, 1 pound 8 ounces.

Richest Flat Crepe

14 F 133 A world of beauty and ineffable charm in this graceful Frock. Brought out in the season's richest favorite—All Silk Flat Crepe of unquestioned quality.

Let your eye roam over its every lovely detail. Follow the soft lines of its contrasting, or better, ombre shaded trimmings; from the lovely neck, down the button marked front panel; softly girding the waist and falling in dressy front ties; and twice encircling the lovely skirt.

The divided jabot falls in soft cascades from a modish shoulder yoke, above which rests a captivating self flower in the deeper trimming hue. Similar tone snap cuffs finish the gracious sleeves. Faultlessly laid box plaits bring the new swinging fullness to the skirt front, stitched to hip depth to preserve the slender silhouette.

WOMEN'S SIZES: 34, 36, 38, 40, 42, 44 inches bust. Length from back of neck to bottom of basted hem, 44 and 47 inches. State bust and length wanted. Read "How to Order" on Page 56. Shipping weight, 1 pound 8 ounces.

A New Balkan Design

14 F 121 If the Russian peasant could see this newest adaptation of her native costume, with what wonder she would gaze on the splendor of its embroidered sleeves; with what appraising fingers she would examine the fabric. With an unmistakable Parisian touch, every feature of the festive smock is used in this artistic model—from the easy flow of the raglan sleeves to the careless flow of the handsome sash. Sleeves and graceful fullness. The exquisite All Silk Flat Crepe will delight the woman who insists upon quality.

A New Superior Quality
Characterizes Every Dress from Our Shop of Finer Fashions

ONE of our customers says: "No longer do I order by mail with the slightest misgiving. The new garments which I have recently purchased from Ward's New Fashion Shop have been the wonder of all who have critically examined them."

The Two-Piece Effect Influences the Dressy Mode

14 F 143 The simulated two-piece Dress takes second place to none, at smart afternoon functions where fashionable women gather. For this clever style is here to stay, and the more variations of it the better. A new feature in this frock is the stitched plaiting of the front skirt. It serves a double purpose by lending an air of novelty and holding the plaits neatly in place. Another distinctive characteristic is the wide jabot, cascading down to the hip band, and fastened with a rhinestone pin. Fashioned of supple All Silk Flat Crepe. Self material edges the sheer georgette collar, cuffs and jabot.

Jacquard Rayon with Plain Rayon

14 F 147 So well does this Dress combine smartness with economy that only by referring to Ward's catalogue could anyone believe that it sells for only $5.98. It is a style that will win the admiration of all, for its lovely new fashion tendencies and combined artfully chosen colors.

A row of fagotting is the band that holds all parts together with a lacy delicacy. The wide front panels open like a coat dress to show a full length vestee. Body of the dress is of a pretty pattern of Jacquard Rayon, with the trimmings in a contrasting shade of Rayon Crepe. Plenty of freedom in the plaited skirt. The all around belt sports a novel enameled buckle. Priced so modestly you may decide to have it as an extra frock.

The Box Plaited Frock Has New Tab Back

14 F 153 We are going to describe the back of this Dress first, for fear that we'll forget to tell you about the two streamers which hang from the neck line to the waist, calling special attention to their existence by rows of bright metal buttons, just like the tab in front.

As a matter of fact, the whole dress of All Silk Flat Crepe, is quite unusual, with its alternating size box plaits from shoulder to hem, and the heavy metal buckle fastening the belt.

Double collar and cuffs of contrasting Georgette over self material with a contrasting edge to match.

Paris and New York Sponsor the Open Hem

14 F 159 Tucks and tucks and tucks, say the latest wires from Paris, and New York fashion creators respond with a new model that obeys the decree of Paris, to the last word.

Style, in this frock of heavy All Silk Flat Crepe, centers around the hem of the garment and rightly, for with short skirts the vogue, the hem line is not the least to be considered.

But, you see, the collar is also tucked and decorated with buttons. From the tucking down, the skirt is made open, folding over in wrap around manner, which Paris and New York are wearing. All-around belt tying in back.

In Every Way a Wonderful Value

14 F 171 An atmosphere of regal beauty rarely achieved in so inexpensive a Dress, surrounds this lovely model. The front shirring of the skirt, the diagonal slant of the fine pin tucking, the unusual all-around overskirt, the narrow double collar and cuffs—these are all fashion features which bespeak the art of Paris designers, and gowns that Fifth Avenue shops sell at three and four times the cost of this one. Supple Lines for Summer Wear

14 F 181 A typical New York Frock for the well dressed New York woman loves a fashion that is youthful, and she knows that nothing is as youthful as simplicity. A small group of pin tucks on each side give graceful fullness above the belt, which ties in back.

But the most notable characteristic of this dress is the quality of the material—a lustrous, All Silk Flat Crepe far better than the price would lead one to expect.

Choice of New York's Smart Set

14 F 293 Rarely does a style meet with such universal acceptance among New York's most fashionable circles as has fallen to the share of this heavy All Silk Flat Crepe. The reason is apparent in the superior quality of material and its many new style features. For instance, the pinched-in side waist line effect that drapes into a girdle crush in front; the bell cuff over the puffed sleeve; the double blouse front suggesting a two-piece dress; the high collar, to be turned down when a softer line is preferred; the two-color belt in back; the prettily plaited skirt; the fancy glass buttons. Everything combines to make this dress handsome, from the soft luster of the heavy All Silk Flat Crepe, to the skillful workmanship.

If You Would Be Properly Fitted—

Follow our clear simple instructions on Page 56. We caution you to allow nothing for fullness. Our Women's dresses are cut 4 inches larger in the hips than in the bust. Our Misses' dresses are cut 3 inches larger in the hips than in the bust. Our sizes are standard. They have been scaled by experts, who have worked out the exact relative figure proportions and our dresses are designed to fit the following measurements. These measurements should be taken according to our "How to Order" instructions on Page 56.

Women's Dresses—Pages 4 to 13 incclusive

Bust Measurement	34	36	38	40	42	44
Hip Measurement	38	40	42	44	46	48

Years	14	16	18	20	22
Bust Measurement	32	34	36	38	40

There is nothing confusing about them. If you measure 36 inches across the fullest part of the bust, and 40 inches hip, order a size 36. We have designed our dresses to fit—make no allowance.

With a womanly instinct for the unusual, the trimming on this Hat pops up in a most unexpected place. "The back of the hat should be at least as attractive as the front" seems to be its motto, so it poses an extremely pretty satin ribbon plaiting and bow arrangement at the rear. Your Head Size Is Important

Your Hat will be more becoming if it fits your headsize correctly. Therefore it is highly important that you give us your exact measurement. It is a simple matter to measure your size by placing a tape around the fullest part of your head, as in the illustration. If you wear your hair coiled low at the neck, place the tape a trifle lower than would otherwise be necessary. Be sure the hat you order is listed in your head size.

Guaranteed Sun Fast and Laundry Proof Superb Quality

Approved by Government Experts

This Frock is made of the well known Suntub Fabric—a cloth that has passed the most exacting government tests for color.

Yet, in spite of its strength, it is as soft and pliable as Pongee. Such sterling qualities deserve to be fashioned in this chic, tailored model. The vogue for hemstitching has been employed to outline a vestee, carrying out the effect of the collar, also hemstitched. Do you wonder we are proud of this dress and its low price?

Strong Indian Head

As trig and trim as a uniform, and unusually strong and durable. For the woman whose business or professional duties demand immaculate white, and for the woman who prefers white dresses in and about the home, here is a dress that will always look neat, no matter how often you put it through the washing machine. Easy to iron, too.

The collar and neck are of two thicknesses of the cloth for strength. You'll like the kimono sleeves for the freedom and cool comfort they give. Wide, inverted kick plaits fall below the deep patch pockets, to add style as well as width. Ties in back with sash.

If you want a dress that will always look sanitary, cool and efficient, you will never find a better one at $1.59. A new proof of Ward's better values.

Daintily Embroidered

It is called an Apron Frock, but really the only resemblance it bears to an apron is the protection it offers, for it is as carefully and delicately embroidered as a dress frock. Certainly pretty enough to wear to neighborhood sewing parties. The quality of the broadcloth is a wonder at the price.

The inverted plaits in the center front give plenty of fullness to the skirt and add a popular panel note. The pointed tabs on the pockets as well as the insets on the waist, the collar and cuffs are made of plain color material.

The contrasting binding on the collar and pockets is vivid and attractive. Plaits below the pockets in front give the effect of a panel and add the required fullness to the skirt. Black ribbon tie.

How to Order Corsets, Girdles, Corset Brassieres

It is easy to order a well fitting garment from Milady's Corset Shop. The picture at the right shows you how to take your measurements, and the individual description of each garment tells you what measurements to send us to get your right size.

For Back Lace Corsets

You deduct two inches from your waist measure, to allow for spread of laces. For instance, if your waist measure is 28 inches over your present corset, you will order size 26.

For Front Lace Corsets

You deduct one inch from your waist measure, to allow for spread of laces. For instance, if your waist measure is 28 inches over your present corset, you will order size 27.

For Corsets and Girdles With No Lacing

Order your actual waist measure taken over corset. Also state hip measure, taken over corset.

When Ordering Corset Brassieres

Order your actual bust measurement, and also state your hip measure. We will then send you the size that you should wear in that garment. Our corset brassieres are easily adjusted by taking small darts in the side seams.

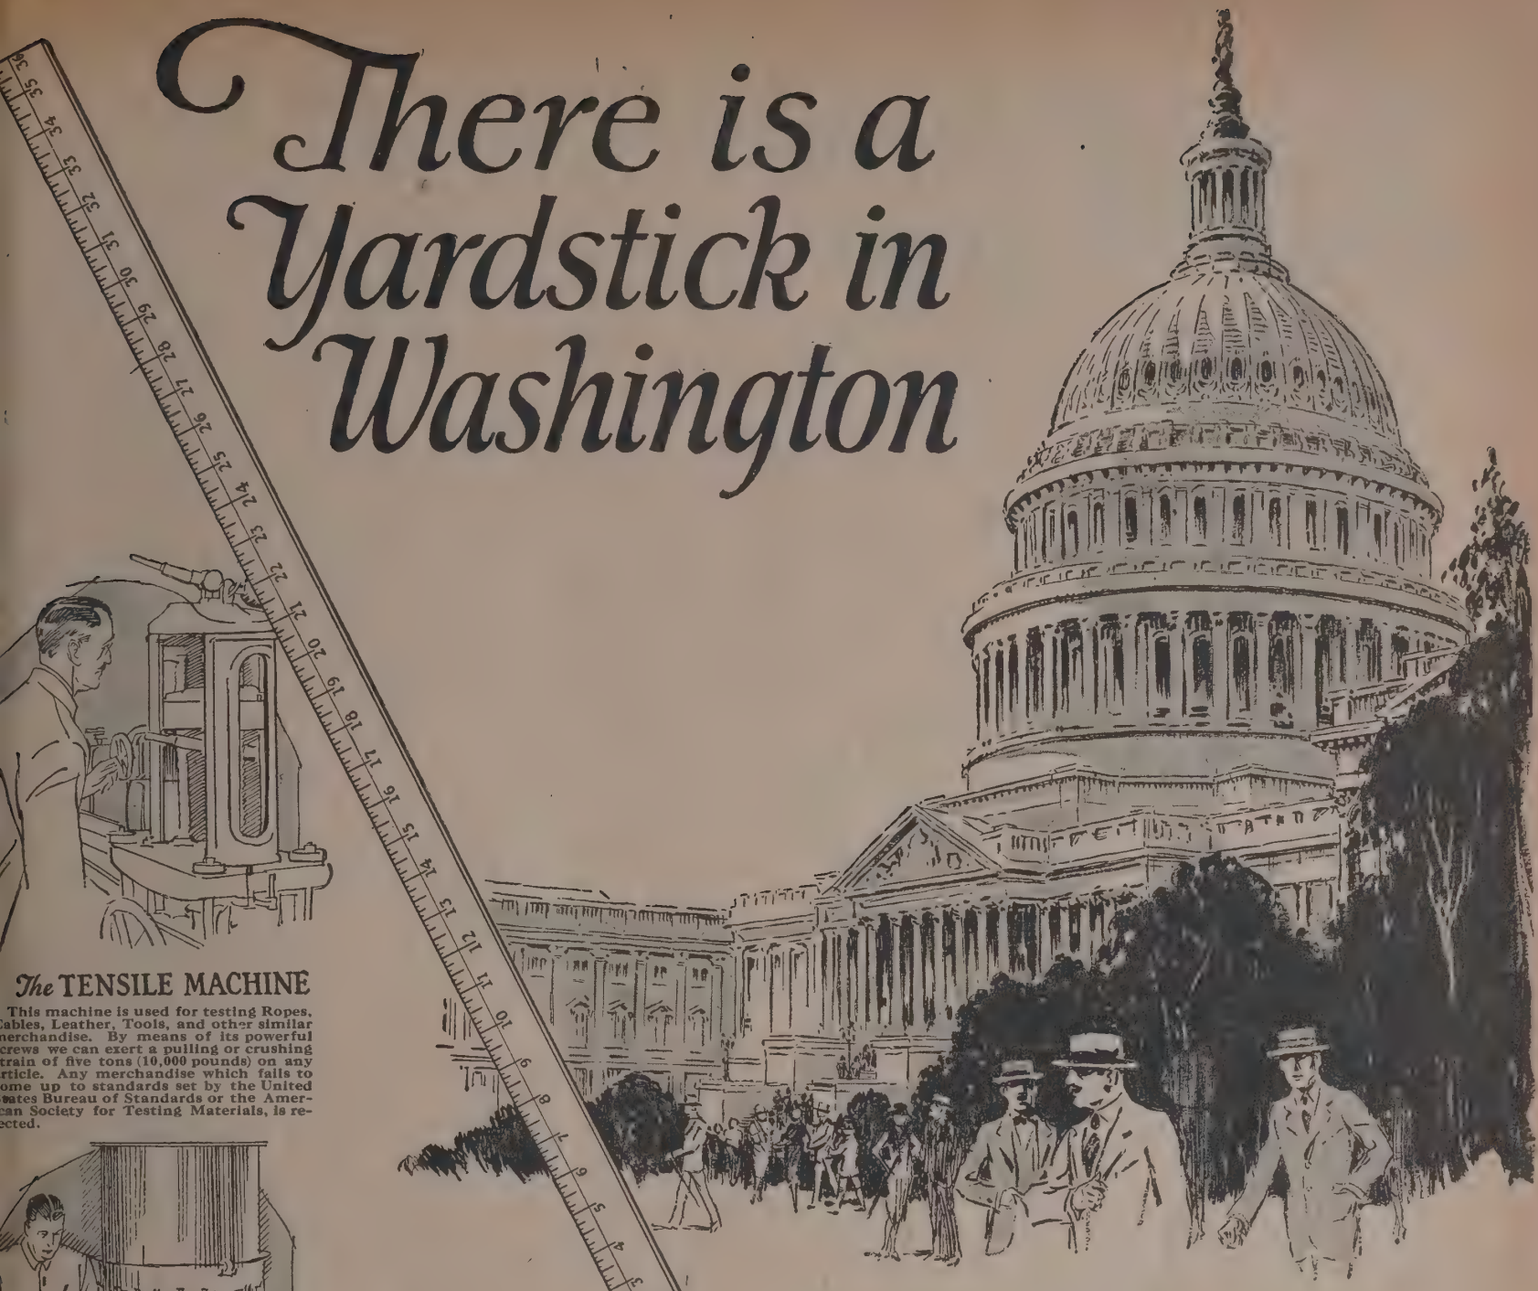
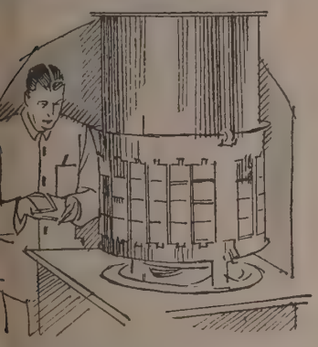
There is a Yardstick in Washington



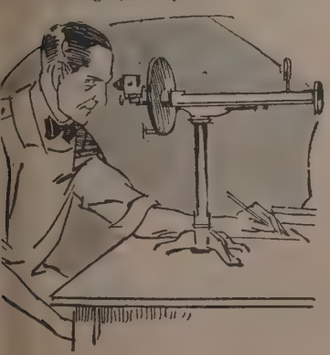
The TENSILE MACHINE

This machine is used for testing Ropes, Cables, Leather, Tools, and other similar merchandise. By means of its powerful screws we can exert a pulling or crushing strain of five tons (10,000 pounds) on any article. Any merchandise which fails to come up to standards set by the United States Bureau of Standards or the American Society for Testing Materials, is rejected.



The NEW FAD O METER

This machine is used to test the fading effect of sunlight on Fabrics, Paint, Window Shades, Linoleum, Carpets, and Wall Paper. The light used in this machine is so powerful that eight hours exposure is equal to twelve hours of noonday sunlight. Any "sunfast" colors that fade when exposed to this powerful ultra violet light, are rejected.



The POLARISCOPE

With the Polariscope, scientists are able to determine the quality of Sugar Candies, Syrups, and Extracts. Sugar which has been in storage any great length of time, loses part of its sweetness and will not measure up to the high standard required by the Pure Food and Drugs Act. All sugars and extracts sold by us must show by polariscopic tests that they are fresh and fully up to standard.

THERE IS, in the Bureau of Standards in Washington, a yardstick known as "Bronze Yard No. 11." It's the accepted standard of measurement of American Industry, used to determine the accuracy of all yardsticks sent for comparison. During the comparison the two yardsticks are enclosed in a double box and kept at a constant temperature, precise comparison being made by means of two micrometer microscopes. Any inequality, even to the hundred-thousandth part of an inch, is quickly revealed.

Just as all yardsticks, to be accurate, must measure up to this yardstick in Washington, so must all of Ward's merchandise measure up to the high standards of *quality* which we have established during 55 years of experience.

No manufacturers' statements are accepted at face value in this great store, for their standards are not always our standards. Your future confidence and continued good will are too important for us to rely only upon manufacturers' claims.

Before we can tell the truth, we must *know* the truth. To be truthful requires more than guesswork, more than ordinary care. This is the purpose of our Laboratory, to test with the all-seeing eye of the microscope; to analyze with the unerring skill of the chemist; to duplicate the conditions of actual usage; to *tell us the truth* about clothing, hardware, groceries, tires, drugs, dry goods, leather, rugs, paint and thousands of other articles in this book. Samples of each incoming shipment must receive the O. K. of our Laboratory before we accept the merchandise for our customers.

That is why we can guarantee that you will find every article shown in this catalogue to be exactly as pictured and described. Our continued growth and our millions of satisfied customers are proof that you can depend upon what we say.

Windows Make or Mar The Beauty of a Home

TRULY there is nothing that makes such an astonishing difference in the appearance of a house or a room as its windows. From the outside beautifully decorated windows make a house look cozy and inviting. But, if not dressed attractively, windows may ruin the beauty of the entire home.

Then too, on the inside, draperies are very important. They can make a room look pretty and homelike or very bare and plain.

Do you realize how easy it is to make your windows really lovely—full of life and character? It is not a question of much money, for the most beautiful effects are often quite inexpensive. It's good taste and attention to a few simple rules of harmony in line and color that matter most.

Be careful to have one predominating color in a room and use other colors only to secure contrasts and emphasis. Have your curtains of the prevailing color, or use valance and tie-backs or over-draperies in that shade.

If the wall paper has large designs, plain curtains and draperies are restful. But if the walls are of one tone, gaily patterned draperies add color and warmth to a room.

Had you ever thought that there are many kinds of curtains for the many types of rooms, just as there are various styles of clothing for different types of people? Choose the type of window dress best suited to every room, just as you would select the style of gown and hat most appropriate to your own personality. Then you will have correctly dressed windows and a really charming home.

For rooms that you wish to have a dainty and airy appearance, use soft fluffy materials, perhaps in delicate colors—sheer nets and laces, fine grenadines and marquisettes. More formal rooms, as living rooms and dining rooms often look best with the stately panels, so graceful and dignified. But if your main rooms are rather simply furnished, dainty ruffled curtains are quite appropriate.

Shades of Every Style-Colors for Every Taste

WINDOW SHADES, you know, make such a real difference in the appearance of a room. If their colors are rich and mellow and the texture fine, they will make your windows lovely. But if they are not attractive, your home can not be beautiful. We know that our window shades are the best quality made anywhere, because they come from factories where only the most reliable materials are used. The famous Columbia Mills, known the country over as makers of fine shades, are our chief source of supply. Our buyers have chosen the newest styles and materials—shades which are most popular now in the large cities.

Water Color Shades

Our Water Color Shades are made of a good grade muslin, painted by machine in a process known as the water color process. Although sold at a low price they are the best shades of this type that are made.

Machine-Made Oil Opaque Shades

The Machine-Made Oil Opaque Shades made of good quality muslin are more durable. Painted by machine with a high grade oil paint, they are heavier and more lasting. Buy machine-made oil opaque shades if you want a very satisfactory shade for your money.

Hand-Made Oil Opaque Shades

Much richer and more durable in finish and quality, the Hand-Made Oil Opaque Shades will give you better service. They are painted by hand with the highest grade oil paint on a better quality of muslin, specially treated for the purpose.

Hand-Made Unfilled Opaque Cloth Shades

These shades are exceptionally fine quality, made with unusual care. They are constructed of cambric and hand painted with the highest grade oil paint. This material has been just recently produced to fill a real need for a moderately priced unfilled shade cloth which will not crack and will withstand harder service than the ordinary shade.

Extra Quality Hand-Made Unfilled Cambric Cloth

Our Hand-Made Unfilled Cambric Cloth is absolutely the finest of shade fabrics. It is the very best cambric, treated with the highest grade oil paint. This material is guaranteed not to crack or fade. It is a medium weight, closely woven texture that is amazingly durable.

Holland Shade Cloth

The famous Holland Shade Cloth is entirely different from the shades just described. Its selected semi-transparent muslin is finished with a soft gloss which makes it very rich in appearance and especially suitable for rooms that seem to need a little more light. We offer two grades of Holland Shades—the satisfactory and economical American Holland Shade and Ward's Special Holland Shade which is of much better quality muslin.

Austrian Plisse Shades

Austrian Plisse Shades, with their soft crinkled effect, are especially decorative. Many use them for curtains as well as shades. All of our shade rollers are dustproof and ravel proof. Mechanically perfect they will always operate your shades smoothly and quietly. All of the metal parts that are visible when these shades hang are electro nickel plated over brass and will never rust.

How to Order Window Shades

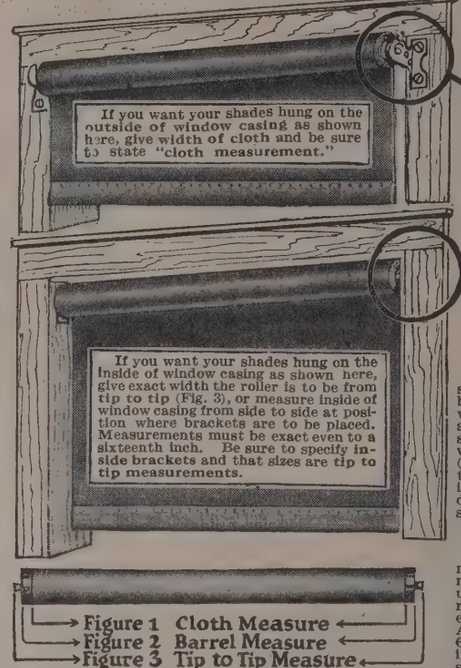
The width of shades given in our price tables is width of cloth. We can furnish Window Shades to fit either inside or outside of your window casings. Shades can be furnished in sizes wider than 36 inches only where stated.

The following instructions should be followed when ordering window shades:

Use a yard stick or a ruler and take the exact measurement. Do not use a cloth tape line. Always measure at the top of the window casing.

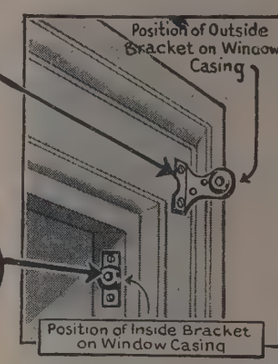
When made-to-measure shades are desired if size you want is not given, state exact size wanted, and allow the price for the next larger size.

Remember always to take measurements as illustrated below, and tell us the kind of brackets (inside or outside) you want and what measurements were taken—Cloth Measure (Fig. 1), Barrel Measure (Fig. 2) or Tip to Tip Measure (Fig. 3).



If you want your shades hung on the outside of window casing as shown here, give width of cloth and be sure to state "cloth measurement."
If you want your shades hung on the inside of window casing as shown here, give exact width the roller is to be from tip to tip (Fig. 3), or measure inside of window casing from side to side at position where brackets are to be placed. Measurements must be exact even to a sixteenth inch. Be sure to specify inside brackets and that sizes are tip to tip measurements.
Figure 1 Cloth Measure
Figure 2 Barrel Measure
Figure 3 Tip to Tip Measure

If old, inside or outside brackets are up and you want shades to fit, give barrel measurement of roller (Fig. 2) or exact distance between the brackets.



In measuring for length of shade add six inches to window opening from top to bottom. This extra length of cloth prevents shade being torn from roller and allows for turning and re-hemming when soiled. Give color, but if not sure of color write for samples. If ordering a duplex (two color) shade, specify which color is to face inside. Be sure to follow these instructions carefully. We can then handle your order promptly and guarantee shades to fit.

Shades in Narrow Width

Window Shades listed on this page are not furnished wider than 36 inches cloth measure or 37¼ inches tip to tip measure. We can furnish them, in widths narrower if you state width wanted and allow extra for cutting down size of each shade. Allow 3¢ extra each on plain shades and 6¢ on fringed shades. On fringed shades in smaller sizes allow two days extra for shipment from Factory. Complete fixtures included. Outside brackets sent unless inside brackets are specified.

Plain or Fringed Machine-Made Oil Opaque Window Shades

As people judge your home so much by its exterior appearance, you should always use fresh looking Window Shades—shades that are not torn or faded. You can refit all of the windows in your home at very slight expense if you buy these thoroughly satisfactory shades now while we offer them at this amazingly low price. We highly recommend the durability of this oil opaque (non-transparent) fabric manufactured in one of America's greatest window shade factories. It will withstand the buffeting that window shades are always sure to receive. Day after day it will keep out the sun or strong light, and at night it can give your home complete privacy. Choose the soft light colors, if you want your windows to be most fashionable. They make the light seem especially soft and mellow. The guaranteed nickel trimmed roller will keep its life and respond quickly to the touch. Choose either the plain shades or those with a straight 2-inch cotton bullion fringe listed below. Fringe matches the color of the shades. If shades narrower than 36 inches are wanted, read "How to Order" them at the right. Not made wider than 36-inch cloth measure.

Another~ Million Pairs

Sales Increased in 1923~1924 ~more than a MILLION PAIRS

Sales Increased in 1925~1926 ~still *another* MILLION PAIRS

Over 2 MILLION *Pairs* INCREASE *in 4 Years*

Such growth is almost unheard of, for to win new friends by the millions requires more than low prices, more than good quality or latest style. It means that those who have worn our shoes have been so pleased that they have told their friends and this message of satisfaction has traveled and spread to ever increasing numbers.

Shoes made by specialists have won for us a leading place in the shoe business of America. No one factory can expect to excel in the making of dress shoes that possess distinctive style, of comfort shoes that are kind to tender feet, of children's shoes in special foot-conforming patterns and of work shoes in toughest leathers for long wear. Each must be made by a specialist. This fact is proved by experience and sales.

The fame of our nationally popular shoes for Women is spreading. Foothealth, Stoutrim, La Crosse and Nightanday are respected and familiar names in thousands of homes. The sales of our equally famous shoes for children have shown that Footshape, Hippity-Hop and Pitter-Patter, answer every Mother's quest for comfort of strenuous little feet. Men of good judgment throughout the nation are finding the style and quality they prefer in our Beau Brummel. And this year we bring you greater values than ever before.

The more shoes we sell, the lower we can make our prices. The more shoes we buy, the lower costs we can get from manufacturers who are anxious to get our big orders. By ordering huge quantities from manufacturers who specialize in one line of shoes, we maintain the high standards of quality for which our shoes are nationally famous and save you money as well.

Thus our shoe department is marching forward. It is keeping pace with America's demand for lower prices. It is fast becoming the shoe headquarters of a nation, for our sales have steadily increased over two million pairs in the last four years.

Shoe Styles Fifth Avenue is Wearing

TRIM, dainty footwear is the fashion of the hour. Foot smartness was never so necessary, for the short skirt mode has made the shoe a very prominent feature of Milady's attire.

Graceful carriage—the first requisite of true style—requires that the feet be not only well groomed, but comfortable as well. Thus the season's newest ideas in footwear are a happy wedding of grace and comfort, of charm and ease.

Only correct materials and expert workmanship can achieve this desired effect.

A glance at this and the following pages will reveal how well we have succeeded. In harmony with Fashion's latest note, we have sought for poise, for graceful curves and modish designs, expressed in newest materials and finest workmanship. Color and unusual design take first place in this season's style calendar. New leathers—cherry patent, iridescent patent, reptile leathers—truly a gay array, step to the fore.

And yet we bring you not only newer, finer, more comfortable footwear, but even greater shoe economy.

A High Standard of Shoe Quality

Famous KORRY KROME Soles - GOODYEAR Rubber Heels

Why KORRY-KROME Soles are Stronger-More Flexible

KORRY-KROME sole leather lengthens the life of a shoe. Chrome, being a mineral, imparts greater resisting qualities than a vegetable tanning. Just as chrome steel is the finest and most durable product of the steel maker's art, so sole leather when tanned by the **KORRY-KROME** secret process is distinctly superior to any other. Famous for long wear and flexibility.

MEN interested in quality Shoes will marvel at the values offered on this page. At less than $5 a pair we offer our customers shoes of such sterling materials and workmanship that their quality is not matched in the U. S. A. at these or even higher prices. Where else can you buy shoes that combine all these great features?

—**KORRY-KROME** leather soles
—Genuine Calfskin or kid leather uppers
—Full cushion insoles in most styles.
—Every pair has a steel arch built in
—Genuine Goodyear rubber heels

And they're made in a factory that is famous for the high quality of its men's shoes.

The illustration at the left shows a flat, fallen arch. The illustration at the right shows how a correctly fitted arch support will comfortably bring back to its normal position a fallen arch.

Weakened or broken arches are known to cause pains that often extend up in the limbs, even to the point of being responsible for severe headaches. Do not start with too high an elevation but every two or three months fit the support a little higher until the natural contour of the foot is reached.

How to Order Arch Supports

Place your feet firmly on a piece of paper and with a pencil held upright draw the outline of each foot and mail with your order. These outlines will enable us to select the correct size. Give the size of the shoe worn.

How to Order Hosiery

It is easy to get perfect fitting Stockings for all the family by following these directions. Place heel of foot (after removing shoe) on a ruler, being careful to let it come just to the edge. The size of your stocking is the length of your foot in inches—if your foot measures 8½ inches, your size is 8½. If it measures 8¾ inches, your size is 9.

This wonderful new discovery is in the making of men's socks. When a process is found by which one pair of socks is made to last as long as two or three pairs of ordinary socks, wouldn't you, too, say it was a wonderful discovery?

The weakest part of every sock has always been the toe. Men complain they "go through" their socks at the toes all too soon. After that they have to wear darned socks which at best are mighty uncomfortable.

Less Mending—Greater Comfort

In these new reinforced socks, the toes are the strongest part. A special machine, which it has taken years of experimenting to complete and perfect, knits in an extra thread across the toe just where you need it. The extra thread is invisible. Your foot won't know it's there. But you'll realize it must be there when you no longer have to experience the discomfort that is always caused by darned hosiery.

These socks are knit from fine quality Pure Silk. Heels and soles are firmly reinforced with mercerized cotton. Ribbed knit top. The best silk hose we or anyone else have ever offered at 50¢ a pair.

And here are fine mercerized Cotton Socks built with our new extra heavy toe—the special reinforcement that doubles and even triples the length of satisfactory service. Choose them for service, because they last so long; for satisfaction because you'll have no uncomfortable darned places pressing against your toes. You men who "go through" the toes of your socks after just a few wearings, try these. You'll know comfort and freedom from hosiery troubles such as you've never before experienced.

Made with double sole; seamless feet for comfort. High spliced heels. Ribbed knit tops. Socks wearing longer than the average are worth more. When they wear longer and cost less—they're bargains!

Pointing the Way to Better Hosiery Values

Of The Hundreds of Hosiery Mills
Less Than 50 Meet Our Standards of Quality!

JUST when you were telling yourself, "Time to buy Stockings again," what a miracle to find that a whole staff of Ward's experts has gone before you, examined the hundreds of makes and brands on the market today, tried them, tested them, and chose—in every case—the very best value for the price! Our new Hosiery Department offers you just this wonderful service.

Hundreds of mills are making hosiery in this country today. Less than fifty can comply with our standards of quality. From these mills we have secured the best values to be had—sheer chiffons, service silks, fine lisles, beautiful Rayons, sturdy cottons—stockings for dress, stockings for sports, stockings for constant everyday service—stockings for every member of the family and every time of day.

Two Hundred New Styles and Colors—Every One Improved Quality

In the old days, stockings were just stockings, bought for service alone. Today they are the A-B-C of fashion.

The fashionably dressed woman of today insists on buying her hosiery where she finds the fullest array of the new shades in the correct weight and style for every occasion. She buys where she knows quality has been pre-tested and value guaranteed—the best for the money—whether it is filmy chiffon for herself, rough-and-tumble stockings for the youngsters, or sturdy everyday socks for the man of the house.

Describing The Newer Hosiery Shades

1. **Beige**—A soft medium tan, lighter than tanbark.
2. **Champagne**—A nude shade blending into a deep cream tone.
3. **Flesh**—A light or natural skin shade.
4. **French Nude**—Darker than nude and with a rosy tint. Very popular this season.
5. **Gravel**—A trifle deeper tan than nude.
6. **Moonlight**—A light, silvery gray.

TELLING OF SILKS AND RAYONS

LONGWEAR Rayons are fine examples of the new Rayon materials—richer, finer, more lasting, than any silk substitute before made. They look like silk—have the smooth, soft feel of silk. And they cost much less!

Early Rayons—fiber silks, they were called—bear no resemblance to this lustrous new fabric creation, which will give you as good service as silk if you follow the simple washing directions included with each garment. (Use suds of mild soap; do not rub on board.)

LONGWEAR Rayon garments are made for Ward's with every care to detail; with seams carefully stitched so that they will not tear and "run." They are made as few Rayons are made—knit (not stretched) to shape in the making. After washing they still retain their original shape, their original color—and that wonderful elasticity that makes them so comfortable to wear, so flatteringly slender in line.

Every Rayon garment we offer is of thoroughly dependable LONGWEAR quality—well made, well finished, full cut. Every one brings you a really worth-while value.

How to Order Maternity Wear

Our Maternity garments are all designed to take care of the needs of the developing figure.

In ordering Corsets or Corset Brassieres it is only necessary to state your present measurements. Do not deduct for lacings except on Corset 32 F 1554 and Corset Brassiere 32 F 1676. Every garment is cut full, and provided with means for enlarging when necessary. There is no need to order extra sizes; that has been fully taken care of in the design and development of the garments.

The quality of these garments is far above the average. We are glad to guarantee your entire satisfaction with every one you buy.

All corsets and corset brassieres come to you fully laced—easy to adjust and ready to put on.

Pies—Mother's pies. Cakes and cookies—Mother's cakes and cookies.

Mother's jams and jellies and hot bread and biscuits.

Childhood days. Memories of good things to eat—and we never doubted their quality because Mother made them.

The RIGHT *Quality*

CLOTHING, food, tools or playthings—there is an ideal quality for everything.

Every article you buy from Ward's is designed to serve a definite purpose. It has been selected because it possessed to the highest degree certain features that make it more desirable than any similar article in its class.

There are some grades of gingham too sheer for kitchen aprons, and some grades of silk too coarse for party dresses.

It's the utility that determines the character the material should be. Excellence of character can be judged only by the service rendered.

Your good will and continued friendship for Ward's depend on the service you get from the articles you buy from this catalogue.

Low prices alone would not hold the friendship of millions of our customers. Low prices alone would not keep the friendship of the thousands of families who have dealt with us ever since this business was started 55 years ago. Low prices alone would not have doubled our business in the last five years.

Quality alone makes friends. Excellence of character is long remembered after all money-saving has been forgotten. It's the service our customers get from the articles they buy at Ward's that has built this business and will continue to make it grow.

Your esteem, your confidence, your faith, your continued patronage, mean more to us than quick profits.

That is why we insist that every article you buy should possess the quality that will insure your complete satisfaction and *future* good will.

We Never Sacrifice QUALITY *to Make a Low Price*

Your Choice of One or Two Pairs of Trousers

Colors and patterns count most in men's clothes this year; and we are showing here some of the neatest patterns you ever saw in really fine woolens—the season's best!

The materials, too, deserve high praise. When you can buy durable, style-retaining, hard finished All Wool worsteds like these for less than $35, it's surely the time to buy.

Tailored in Our Own Shops

You are interested in the tailoring—and you should be. The making of the Suit is a highly important factor in the wear. Both models shown on this page were tailored in our own shops—made right—styled right—carefully cut—strongly sewed with silk thread. You can expect long wear, and the style to stay for a long, long time.

Men's Model

One of the finest Men's Suits we have shown in a long time. Can be had with either one pair or two pairs of trousers.

The colors are by far the neatest we have seen in many a day, and they will not fade. Three striking patterns—a fine striped black that is justly coming back to its own. A neat appearing striped dark shade of blue, and the third—a rich striped dark brown. You are sure to like any of them. The material is an exceptionally fine woven All Wool worsted.

The style is tailored in to stay—and it will remain through the life of the suit. Trousers with cuffs are cut medium full while the coat is lined with Gibraltar serge—a very strong material. Regular vest.

This is The Way to Measure

Men's, Young Men's and Youths' Clothing

It is a very simple matter to order comfortable fitting clothing from Ward's. All you have to do is send us a few necessary measurements to enable us to select garments of a proper size for you.

State Exact Measurements

All of our clothing is cut over full size patterns to fit the average figure, so do not make extra allowances. State the exact measurements taken as we show in illustrations at right; and always state **height, weight and age** of the person who is to wear the garment. This information is a great help in fitting men of unusual build.

How to Measure

Have someone take the measurements for you. Do not try to measure yourself. Be sure to write the correct sizes plainly to avoid mistakes.

Measure the Chest

Chest measurement should always be taken over the vest. Place the tape all around the body close up under the arms, and bring forward across the chest. Let arms hang straight at sides. Do not take this measurement too tight, and do not allow tape measure to slip down in the back. Make no allowances. State exact measurement. **See illustration above.**

Measure the Waist And Inseam

Waist. Place tape measure all around your waist just above the hips over your trousers like a belt. Do not take this measurement too tight for the most comfortable fit. Illustration 2 at right, shows you just how to take this measurement.

Inseam. Length as indicated by arrows. See Illustration 3. To find easily the proper inseam measurements, have the tape measure placed close up in the crotch and continue down the inseam of the trousers to the desired length, as shown. If you order cuff bottom trousers, the inseam measurement should be a little shorter than for a plain bottom trousers. It is impossible for us to make definite recommendations as to the length because every man has his own idea about how long he wants his trousers.

The Type of Suit You Want

At Two-Thirds Its Value All Wool—Powder Blue

$15.95

We don't have to tell you fellows that the style's there—style with smarter lines, lines suggestive of the athletic figure. And then the color—it's a modish shade of powder blue as you'll find in the highest priced suits. The coat is half lined with alpaca. There is wholesome sturdiness in the fine All Wool twilled cassimere, smooth and closely woven. The care with which the suit is tailored shows in its appearance. The months of wear the suit returns will prove its real worth.

Under ordinary circumstances it would be impossible for us or anyone else to sell a Suit of this quality for less than $20; but an unusually large purchase of piece goods at 60 cents on the dollar enabled us to quote this price.

The economy and wisdom of buying this suit will doubtless be apparent to both the style-seeking boy and the value-seeking parent.

Our "Friend Maker" All Wool Fabrics Four Popular Colors

Men who know quality tell us this is, without any exaggeration, one of the greatest Suit values we or anyone else ever offered. A strong statement, but we stand back of it with the actual proof. The beautiful All Wool closely woven worsteds from which these suits were made, formerly went into suits that were bargains at $35.

We call them our "friend makers" because anyone who buys such a markedly superior suit at this price will surely come to us for his next. We believe you men will approve of the style and colors—they're sensible yet they're not without their smartness. There are two blues, one the popular blue serge, the other a striped navy blue. Another is a striped black. The fourth is a very neat looking striped medium gray.

This suit, like our young men's model, is hand finished and superbly tailored in every detail. Sewed throughout with silk. The collar is correctly cut and sewed to hug the neck. Coat is full lined with alpaca.

Boys' Suits *of the* Better Kind

Quality all the way through-

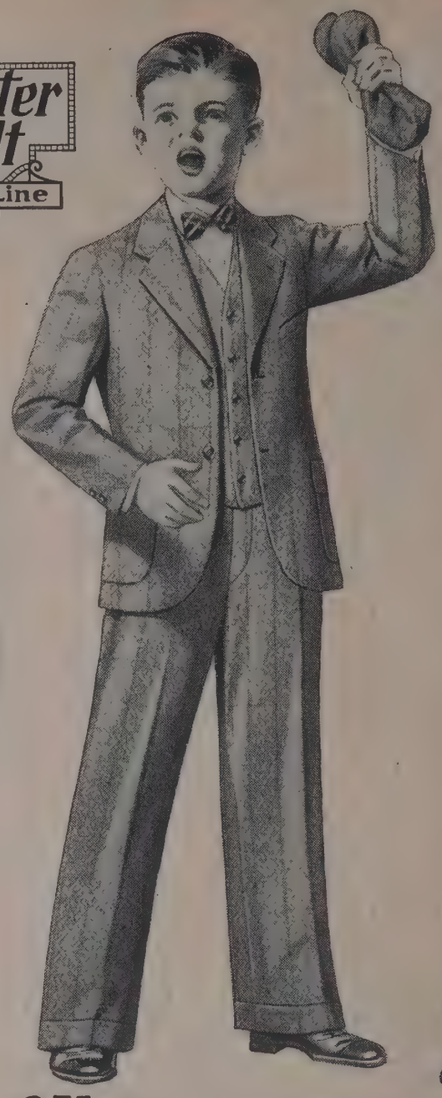
Character Built Junior Line

A Message! To the Parents and Boys Everywhere in America!

YOU already know that Montgomery Ward & Co. can, and does, save you money. That is common knowledge. You are also acquainted with our ironclad guarantee policy. Here's another message for you—

Each year hundreds of boys' measurements are taken so that we can best determine the sizes of our boys' suits. Once that size is determined, the cutting, the patterning, the tailoring, and finally the finishing, are all standardized. And every suit, knicker and longie or topcoat, is cut over these patterns. There are no exceptions. You now see why it is not necessary to order a size larger than you actually need, simply because that garment is low priced. Our low priced garments are finished and sized with the same painstaking care that characterizes every article of apparel you order from us.

These have always been our aims. That we have succeeded in carrying them out is evidenced from the thousands of enthusiastic letters we have received from satisfied parents from every part of the globe.



$9.75 One of Our Greatest Longie Values

Here, mothers, is the greatest boys' clothing value in all America today. That is claiming a great deal, but we are prepared to substantiate all these claims.

In order to obtain this value, we had our buyers search every available source of supply. Finally we found the fabric we had in mind—a beautiful strength tested All Wool cassimere, possessing every desirable characteristic that both boy and mother could desire. You'll find this same fabric in the boy's suit at the left of the page.

And now, fellows, how do you like the style? We selected it because it's just about the snappiest model we saw on our eastern trip. Mothers will say they never saw such beauty of fabric and such remarkable wearing quality embodied in one suit before. This suit has every detail just right.

Your choice of two of the season's best liked colors. One a light brown with a plaid and a diamond weave. The other is a bluish gray with a plaid and a diamond weave. Both coats strongly lined with guaranteed serge. In whichever suit you select you'll find that superb quality and style that means so much to both mother and boy. Plain back.

SIZES: 8, 9, 10, 11, 12, 13, 14, 15, 16 years. State size and inseam measurement wanted. Read "How to Order" below. Shipping weight, each, 3 pounds 4 ounces.

Strength, Style At a Bargain Price $9.95

When you consider the extra strength giving features built into this Suit, and the fact that the rich powder blue cassimere is second in strength only to our justly famous Stillson cloth—you, too will agree it is one of the best all round values ever offered in a boys' suit.

We have such perfect confidence in this suit that we ask you to make an honest comparison bearing in mind the incomparably fine tailoring factors that stress the unusual value.

The rich powder blue cassimere of All Wool from which this suit was tailored was purchased from a mill that had immediate need of funds. By taking the whole quantity off their hands we secured the material at 50 cents on the dollar.

This suit is a product of our own tailoring shops where every detail is under skilled and expert supervision. This is your assurance of flawless workmanship. The style is our own designer's interpretation of what's what in boys' clothing. You'll say there's style enough for anyone from the trim, but easy drape of the full lined coat to the perfectly cut trousers. Plain back.

SIZES: 8, 9, 10, 11, 12, 13, 14, 15, 16 years. State size and inseam measurements wanted. Read "How to Order" below. Shipping weight, 3 pounds 4 ounces.

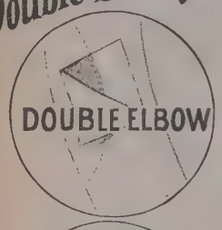
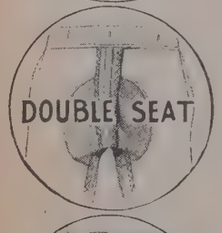
Double Wear! Double Value! Double Satisfaction!





More Than a Bargain It's a "Friend Maker" $9.45

This Knicker Suit has more than style—it is as strongly built as any boy's suit ever made. No matter what the price paid, no boy's suit sold has all these features. Double seat and knee, double elbow, full lined knickers and coat is full lined with guaranteed serge. Loose half belt in back.

There are pictures above to show you the general construction of these features. They can't show, however, the painstaking care with which it was tailored, the high quality trimmings, the wear-defying sturdiness of the good looking All Wool cassimere. The material was bought from a mill owner who sacrificed the cloth because he needed cash—you share liberally on the saving.

Let the boy see the vest—it's mannishly cut just like dad's; and also the cut of the coat. He knows style and has a right to get it.

There's all the style and beauty of fabric that go with the most expensive school models, at just about half what they'd ordinarily cost. We know that this is something more than a bargain—it's a "friend maker."

SIZES: 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16 years. State size wanted. Shipping weight, each, 3 pounds.

Were you to search everywhere in the country, you would not find a sturdier or better made Boys' Suit at this or any other price. That, as the garment itself will prove, is a fact.

The average boy is hard on his clothes—we know that. This moleskin cloth suit is built to help solve the problem of how to keep him in clothes. He can climb every tree and fence in the neighborhood and this suit will come out little the worse for wear.

Extra Strong Material

In planning the cut, style and tailoring, every factor having to do with the life of the garment was worked out by our clothing experts. The stitching, the seams and pockets were made as strong as capable hands could make them. You might wonder how we can sell a suit of such superior goodness at this price. An opportune buy and a large cash payment were the principal factors. The garment is unlined. Longies or knickers, whichever you prefer.

The Style the Boy Wants At the Right Price

Grayish Blue

$5.45

If you could see this Boys' Suit you'd buy it without the slightest hesitation. As for the young fellow, ask him how he likes it after he's worn it awhile.

Under ordinary circumstances a suit of this quality would have to sell for $7.00 or more. However, we were able to purchase a quantity of this material at prices lower than the present market quotes. We paid cash, too, another factor that further brought down the price.

The suit is styled in a model that is always in good taste. The material is cassimere twill about 50 per cent, an excellent wearing fabric too. Grayish blue in color. The coat and vest are strongly and fully lined with twill.

SIZES: 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15 years. State size and inseam measure wanted. Read "How to Order" on Page 224. Shipping weight, 3 lbs. 8 oz.

Coat and knickers of both suits are full lined.

Both possess the fabric finish and all round quality associated with much higher priced clothes.

Something the youngster will appreciate on those sultry summer days when the thicker suits of wool are a bit too warm for cool comfort. Your modern boy likes his clothes to be just as good looking as dad's. He demands comfort, too. As for the value he leaves that to mother.

Both mother and son will agree that this neat looking summer weight Longie Suit has all the desirable features necessary. Value is no small part of this Daytona crash cotton suit. Economical, too, you can wash it as often as it gets soiled.

The coat is strongly piped and the entire suit is well sewed and reinforced throughout. Unlined to assure the coolest comfort. At this price it would be an economy to purchase two of these suits.

SIZES: 8, 9, 10, 11, 12, 13, 14, 15, 16 years. State size wanted. Read "How to Order" on Page 224. Shipping weight, 2 pounds 8 ounces.

The Right Suit At the Right Price $5.95

We made an agreement with a mill owner to furnish us with this strong medium weight All Wool twilled cassimere at an amazingly low figure.

The quantity we purchased assured him of steady work during his slack months and us of the opportunity of again giving our customers the most for their money.

There's a handsome hard finish to the material used in this Suit. The color combination is of dark brown with an overplaid, distinctive, yet youthful. Full lined coat and knicker. Coat has inverted pleat in back.

Your better judgment should tell you to purchase this truly excellent value.

Practical and Low Priced Serge $6.45

There's a surplus of "class," good looks and quality in this Boy's Longie Suit—the quality can't be illustrated, let our guarantee take care of that. Others may picture a "nice" looking serge suit that may possibly sell for less—but we'll wager that it has not the stalwart goodness of this fine half wool serge.

A big factor that helped to finally seal the low price for this suit was a judicious buying of the material when the market was lowest.

The wear and good looks will serve to strengthen our claims. Coat is full lined with strong twill. Plain back.

80 Per Cent Wool Worsted

There has been a big demand for Army Trousers since the war. Men who have worn them know they stand in a class by themselves when it comes to resisting hard wear. A further evidence of their widespread popularity is the fact that the original supply of army stock has been entirely sold out.

To meet the demand for these service-giving garments we bought thousands of yards of olive drab, 80 per cent wool worsted and had it made up into trousers. This huge purchase enabled us to buy the material way below its present market value, and as a result we offer you these trousers at little more than the material alone would cost today. All seams are double stitched; bar-tacked at all strain points; plain bottoms.

The Most Talked of Overalls In America Today 2:20 White Back Denim A New Pair Free If They Rip

WE planned to make this the biggest Overalls value in the country—to give you the most lasting satisfaction that we, with our many years of overalls building, could produce. That we have succeeded is evident from the many letters of enthusiastic approval which we have received.

This, men, is our "Pioneer"—the garment that made overalls history. Into its making has gone the skill and care that garments at twice this price would not get. These Overalls will give you longer wear, greater service and more all round satisfaction than any garment sold at this price. Made of the finest 2.20 white back blue denim that ever went into an overall, with every seam triple stitched to guard against ripping and the five most used pockets doubly constructed.

Wear Built In to Stay

Facts are what interest you men most. When we tell you that our "Pioneer" is a super overalls value, we mean just that and if, in your opinion, it is not every bit as fine an overalls value as you ever saw, return them at once and we will refund all your money, including transportation charges.

The seams are triple stitched and guaranteed not to rip—a new pair free if they do. That's assurance enough of our confidence in this overall. You men like ample room for limb action and freedom of arms—for that reason we have had these cut over a generous pattern. In fact the "Pioneer" contains more material than many overalls at double our price. The seat is big and roomy, the armholes are full and so are the sleeves.

Doubly Constructed Pockets

Another feature is the pockets. The five most used have a double construction (Shown in small picture at right.) Two thicknesses of 2.20 denim are sewed into the lower halves of the two lower jacket pockets, the plier pockets and the hip pockets. There's a loop for a hammer if you carry one.

This is the biggest overall value in our history. We spent many months of preparation and planning until we were sure we had just exactly the garment we wanted—an overall that would stand up under the severest strain, one that we would be proud to offer to any man in any line of work. With the "Pioneer" already a tried and tested fact we know our customers appreciate this offering. If you are not already acquainted with the "Pioneer" you are urged to order one and see for yourself what an amazingly fine overalls you get for only $1.29.

Extra Heavy 8-Ounce White Back Denim

$1.39 Each Garment

Yes Men, the Longest Wearing Overalls That We or Anyone Else Ever Offered

You can order these Overalls with every confidence in the world. You can make any comparison you like. If by any chance you can duplicate this overall, with all its splendid features at this price, return it at once and we will refund your money plus transportation charges both ways. Certainly no fairer offer could be made than this.

In order to build the finest overalls obtainable many little details were given careful attention—details which might be considered trivial to the average man were mighty important to us. All makes of overalls were examined, their good points noted and when possible improved upon.

Only extra heavy weight 8-ounce indigo blue; white back denim of highest quality is used in these garments. The construction and the pattern over which these overalls were cut allowed ample room for every action. All seams are triple stitched and guaranteed against ripping, all pockets are double stitched and bar-tacked. Overall pockets are self faced, adding to the life of the pocket edge. Two leg seams make the garment hang better; strong lining in suspenders; collars and cuffs are adjustable allowing snug or loose fit as you prefer. In fact, every part of the garment that receives extra wear has been strengthened

Jacket is three-seam style with four large pockets. There are seven generous pockets in the overalls—two front, two hip, combination safety watch and pencil pocket on bib, seven-inch rule or pliers pocket on side and handy watch or match pocket. The low back overalls are two-seam style and the detachable suspenders have elastic inserts. The high back overalls are two-seam style with suspenders attached.

An Outstanding Bargain Of Our Overall Department

Strong Durable 2:20 White Back Denim

There's Wear in Every Thread

$1.00 Overalls or Jacket

All of Our Overalls Are Guaranteed Not to Rip

A New Pair Free If They Do

WHEN we say that these Overalls are one of the biggest values that could be procured anywhere at our price, we mean every word of it. For our own satisfaction we want you to be rigid in your comparisons; and if you are not thoroughly satisfied that they are as big a value as we claim, you may return them at our expense and your money will be refunded.

When we had these overalls built we had in mind the hard, rough wear each garment would receive. To withstand this use and abuse we had to have a tough, sturdy material, one which in each thread would give a satisfactory account of itself in long wear; so we naturally chose 2:20 white back, blue denim. All seams are triple stitched—not double. 42 F 279 is a three-seam, four-button front overalls jacket. 42 F 283 is two-seam, apron style, low back overalls and 42 F 287 is two-seam, apron style overalls.

The jacket has four generous pockets, including a combination watch and pencil pocket. The overalls have two front pockets, two hip, one watch and pencil pocket on the bib, and a dandy pliers or rule pocket on the leg. Also match or watch pocket in right front pocket of overalls. These three garments are our lowest priced 2:20 white back overalls and jacket, and while they will not give the same service as will our "Famous Pioneer" on Page 238, they'll give more wear than you ever thought possible from a pair of overalls at this price.

SIZES: Chest 36, 38, 40, 42, 44, 46 inches. Waist 30, 32, 34, 36, 38, 40, 42, 44 inches. Inseam 30, 32, 34, 36 inches. State chest, waist and inseam measurements wanted. Read "How to Order" on Page 214. Ship. weight, per garment, 1 lb. 12 oz.

Interesting News from Thrifty Housekeepers

Buying power and ready cash make low prices. Eight million customers concentrate their buying in our hands. Therefore, we buy in enormous quantities, for ready cash, at lower-than-market prices

YOU cannot use ordinary price standards to judge the quality of the articles you find in this catalogue.

One of our customers writes: "Sometimes your prices are so low it makes me wonder how the quality can be right. Yet I always find everything you sell to be up to standard, and just as good as you say it is."

Tires at lower prices than the distributor has to pay. Vacuum cleaners sold for $15 to $40 less than others ask. Lawn mowers that would cost you $20 at retail but less than $10 here.—$10 shoes for $6 and less. Stockings, dry goods, suits or dresses—unless you are in the habit of buying at wholesale or factory prices, you cannot help but wonder how we can save you so much money.

To find the secret, you must consider our method of doing business and our cash buying power. One hundred million dollars worth of merchandise has been bought for cash for this 55th Anniversary Spring and Summer Catalogue.

We own many factories. We often take the entire output of other factories, for which we pay spot cash. Thus we often get lower prices than even the jobber or wholesaler must pay—and these savings are yours.

Thus this catalogue sets a new price standard without any sacrifice in quality.

It is a true Buyers' Guide for millions of thrifty American families—for it tells them the correct prices to pay for all their needs.

We never sacrifice quality to make a low price

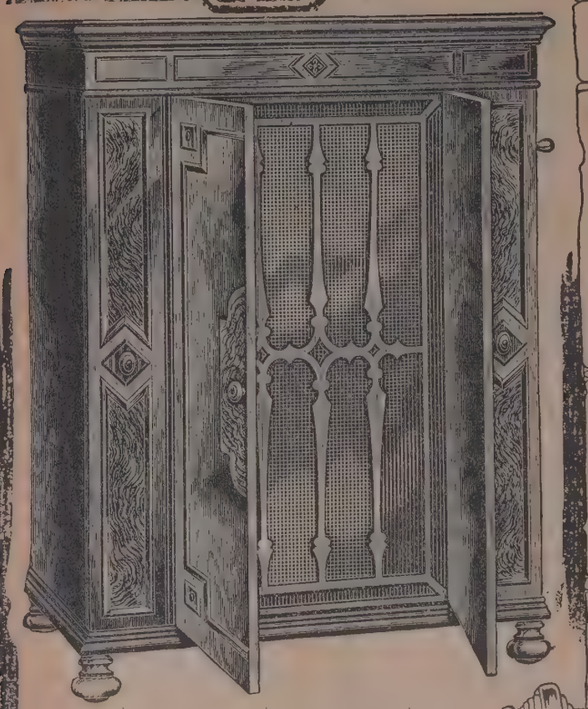
Six Months Ago We Announced
The New Melophonic
The Crowning Achievement of Sound Reproduction

Six months ago the New Melophonic was a mystery, known only to those few who were working on its production. Now it is known to thousands. Its marvelous fidelity of tone reproduction has won the enthusiastic admiration of music lovers everywhere.

Tones that were heretofore lost or muffled in the old style phonographs, are now heard with remarkable clarity. In orchestral selections the highest treble or the lowest bass, while a part of the general ensemble, separate to the same marked degree that you would hear if you were listening to the players themselves.

But it is still a mystery. True you can see it—listen to it—watch its mechanism operate—feel the deep swelling vibration of its organ tone sound chamber. But, like the rainbow or the sunset, its mystery only deepens with familiarity.



Screened Comparison Gives Melophonic Preference

Its realism is uncanny. It seems impossible that any man-made mechanism could so faithfully reproduce music—the individual character of every instrument—the living, vibrant inflections of every shade of the human voice.

Other phonographs have attempted to reach similar perfection. They have succeeded to a remarkable degree. But their prices are remarkably high.

In a recent comparison, the Melophonic Grand and its two leading competitors were hidden behind a screen, and the same record played on each in turn. Fifteen listeners, hearing nine selections, gave the Melophonic the preference—without knowing it was the Melophonic. Yet each of the other instruments sells for $300, while the price of the Melophonic Grand is but $175.

And this same superiority is evident in comparing the smaller models of the Melophonic with corresponding sizes of other instruments. Better tone, more faithful reproduction, cabinet work of genuine veneers, unexcelled by any—and at a saving to you of one-third to one-half.

The Melophonic "Grand"

The "Grand," our largest and finest Melophonic phonograph, is equal in appearance and performance to similar models sold at retail for $300 or more. The artistic cabinet is designed to permit the use of a tone chamber which gives the most lifelike reproductions of voice and music you have ever heard. Piano records, the supreme test of any phonograph, are reproduced on the Grand with such lifelike reality that you can close your eyes and imagine yourself in the presence of the artist. Orchestra, pipe organ, bands, the human voice, all are reproduced with the original richness of tone quality.

The highly perfected reproducer gives an articulation that includes every shade of tone recorded on the record. The extremely long sound chamber gives added sweetness and a rich vibrant quality and becomes an ideal radio loud speaker, when used with radio unit. This is accomplished by detaching reproducer and attaching radio unit. The silent running, triple spring, gold plated motor gives extra playing power of unusual duration. Turntable has plush top. Latest "S" type tone arm of drawn brass, gold plated; and perfected reproducer of unusual volume and clarity.

The cabinet is made from beautifully grained walnut veneer, carefully selected and matched. Ample record space is provided on each side, concealed by paneled doors.

Included are five 10-inch double-faced records and an assortment of needles. Select records from Pages 256 and 257. Height, 46 inches; length, 31½ inches; depth, 21¾ inches. Shipping weight, 185 pounds.
